I'm a patient, problem-solver who listens carefully and stays calm under pressure. I have experience breaking down complex information into clear explanations, managing competing priorities, and building rapport with different types of people. I work hard, take responsibility seriously, and genuinely want to help customers succeed.

WORK EXPERIENCE

The Next Creatives • Mill Valley • 03/2025 - Present

A Marketing/Consulting company for local/early stage companies

Client Support Engineer • Freelancer

Manages websites and creates marketing materials for multiple clients.

- Lead weekly meetings with clients to review progress, identify improvement opportunities, and provide proactive solutions.
- Delivered technical solutions on time, ensuring ongoing maintenance and support through effective communication and collaboration with clients over 6 months.

High Fidelity • San Francisco, CA • 11/2023 - 01/2026

Software Engineer • Full-time

Was given responsibility of implementation, execution, and optimization of frontend and backend tasks including: new interactive customer facing features, admin dashboard pages, and data intensive analytics

- Improved system performance by redesigning expensive background tasks into Microservices with multi-tier caching and asynchronous processing to handle a 3x increase in concurrent users per domain (30 → 90).

Software Engineer Intern • Internship

Was responsible for implementing base features in Industry grade application on all sides of the technical stack.

- Delivered new UI features leveraging Svelte's reactive state management and TailwindCSS, and implemented interactive visualizations using the PixiJS canvas graphics engine.
- Implemented transactions to rest API which eliminated race conditions when writing with high traffic MongoDB.
